Hidden History

Hidden History is a simple letter-substitution cipher. If K equals B in one word, K will equal B throughout the puzzle. Solve by looking for frequently-used letters and common patterns.

© Puzzles by Pappocom

Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Here is a new, complicated technique that sometimes presents itself. The 3 in the right section of the bottom row eliminates the spaces to the right of the 2 in the middle section of the bottom row. The 3 in the center section eliminates the spaces below the 2 in the middle section of the bottom row. This only leave two places for an eventual 3 in the section (green box). We can use that eventual 3 to eliminate the spaces on both sides of the 5 in the lower left section (red boxes). The 3 in the upper right section eliminates the spaces below the 1. The 3 in the lower right section eliminates the spaces to the left of the 1. This only leaves the space to the right of the 2 for the 3 in the lower left section.
