Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Here is a new, complicated technique that sometimes presents itself. The 2 in the right section of the middle row eliminates the space between the 1-9. The 2 in the left section of the middle row eliminates the space between the 4-6. The 2 in the middle section of the bottom row eliminates the space between the 1-6. Therefore, the 2 can eventually only go in the red box. The 2 in the right section of the top row forces an eventual 2 to the green box sections. We can use that eventual 2 to eliminate the right-most space in the red box. Now we know the 2 goes above the 9.
