Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Lets put a 4 in the right section of the middle row of the easy puzzle containing 1-2-3-5-6. The 4 in the left section of the middle row eliminates the space between the 5-1. The 4 in the right section of the bottom row eliminates the spaces below the 1. The only place left is to the left of the 3. This is one way to start solving the puzzles!
