© Puzzles by Pappocom

Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Let's start with the medium puzzle. We will try to put a 1 in the left section of the bottom row that contains 2-4-5-6-7. The 1 in the right section of the bottom row eliminates the space to the right of the 7. The 1 in the middle section of the bottom row eliminates the spaces on both sides of the 4. The only place left is in the center of the section. You have learned one technique used to solve Sudoku puzzles. There are many more.
