Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Let's start with the easy puzzle. Working on the center section that contains 1-5-7-8-9, we can see the 2 in the top middle section will eliminate the spaces above and below the 1. The 2 in the right section of the middle row eliminates the spaces to the left and right of the 9. This only leaves the space to the right of the 8 for the new 2. You have learned one technique used to solve Sudoku puzzles. There are many more.
