Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Let's start with the medium puzzle. Here is a new technique. We will try to figure out what might go in the middle row of the left section of the center row that contains 1-2-3-4-7-9. Those three blank squares in the center row of the section must contain a 5, 6, and an 8. From this information we can see that a 5 must go below the 3, since a 6 and 8 are in the sections above and below. You have learned a new technique needed to solve Sudoku puzzles. There are many more.
