Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Here is another technique. Let's start with the easy puzzle. Check the middle section of the bottom row. Lets use the blank space above the 7. Check in the section and in the row and column of that blank for leftover numbers. The 1 is above, 3 is in the section, 4 is above, 5 is to the right, 6 is above, 7 and 8 in section, 9 to the left. Only one missing is 2! So a 2 goes directly above the 7. You have learned one technique needed to solve Sudoku puzzles. There are many more.
