© Puzzles by Pappocom

Sudoku is a nine by nine grid. The solution (each puzzle has only one) will have all the numbers from one through nine in every row and every column. In addition, the grid is divided into nine three-by-three sections. Each of these three-by-three sections will also contain all the numbers from one through nine. Each Sudoku puzzle from Pappocom can be solved using logic alone. If you prefer guessing, you can – but there is a logical way to solve every puzzle.

Let's start with the easy puzzle. We can see the 4 in the top row middle section and the 4 in the left section of the middle row will eliminate the five spaces along the top and right edges of the section in the left of the top row. This only leaves the space to the left of the 5 for the new 4. You have learned one technique used to solve Sudoku puzzles. There are many more.

			4		6			
	5		1		3		2	
2	7						3	4
		4		8		2		
5	2						7	3
